Web Developer

A recent graduate from a full-stack coding bootcamp with a background in graphic design and art. Passionate about learning foreign languages, computer science, programming, data, and constantly expanding my skill set. Highly adaptive to new technologies, languages, and environments.

SKILLS

- HTML/CSS
- Bootstrap/tailwind
- JavaScript
- JS libraries: jQuery, React, Node
- SQL
- MongoDB
- Java
- Python
- Express.js
- Google Tools
- Foreign Languages
- MS Excel, Word, PowerPoint

WORK EXPERIENCES

Fulfillment Associate   **2019 – 2020**
Amazon DPH2   King of Prussia, PA
- Worked in the "Problem Solve" team to ensure quality products are sent to customers in a timely manner.
- Took on a leadership role, while facilitating high morale.
- Mastered Amazon's internal tools for package management within a short period.
- Worked with spreadsheets for organization and tracking daily shipments and duplicates.

Learning Ambassador   **2020 – 2021**
Amazon DPH2   King of Prussia, PA
- Trained associates and new site managers in the outbound "Problem Solve" tasks.
- Promoted and facilitated Amazon's code of conduct to ensure safety.
- Participated in leadership meetings and helped on-the-ground workers.
- Performed associate and new-hires audits on their performances, as well as bag audits.
- Helped set up and establish CampusShip onto the station.

Learning Ambassador   **2021**
Amazon DDP2   Philadelphia, PA
- Ran onboarding classes and training for new-hires.
- Cross trained associates in "Problem Solve" procedures to solve sortation and delivery issues on the floor and the pick-up driveway, as well as emphasizing safety protocols.
- Registered faulty items and replaced them using Amazon's internal data tools.
- Performed accuracy check on completed works.

DEVELOPMENT PROJECTS

Weather Dashboard
App that enables users to view that particular city's weather forecast for up to 5 days. It relies on the third-party Weather API call to retrieve data by making requests on specific parameters to the URL.
Technology:
- HTML, CSS, JavaScript, Jquery, Moment.js, Bootstrap, and Weather API.
- JSON and local storage to store locally.

Links:
Deployed: binnie51.github.io/weather-dashboard/
Github Repo: github.com/binnie51/weather-dashboard.git

Movie Watchlist
A front end app where users are able to create a personal watchlist of movies they wish to see. Databases are streamed from existing third-party APIs, this case being: imDB and omDB.
Responsibilities:
- Breaking down group tasks by dates using non-traditional project management tools such as Discord server. Creating wireframes and styling the pages. Populating the modal pop-up with data and adding closing features.

Technology:
- HTML, CSS, Javascript, Jquery, Materialize css, IMDb & OMDb APIs.
- JSON and local storage.

Links:
- Deployed: binnie51.github.io/movie-watchlist/
- Github Repo: github.com/binnie51/movie-watchlist

CodeOp (Front End)
A full-stack app where nonprofits could provide a space for real-world experiences through projects for developers to showcase their expertise. The site is built using the MVC architecture pattern. Agile methodology was also exercised throughout the developing process.
Responsibilities:
- Leading front end development. Creating wireframes and graphic images, determining color scheme, and designing app logos. In charge of home, login, and dashboard handlebars.

Technology:
- HTML/CSS, JavaScript, Jquery, and Bootstrap on the frontend.
- MySQL, Sequelize, Express.js and Node.js on the backend. Insomnia for testing.
- Express-session ID within cookie. Faker.js for generating fake contextual datas.

Links:
- Deployed: binnie51.github.io/movie-watchlist/
- Github Repo: github.com/cpaschall/codeOp

COURSES & TRAININGS

Graduated 08/2022   **Certificate for the completion of Coding Boot Camp**,
                           University of Pennsylvania - Philadelphia, PA

EDUCATION

Graduated 05/2018   **Associate of Arts: Art and Design**, Community College of Philadelphia - Philadelphia, PA
